DETAILED ACTION

Allowable Subject Matter

1. Claims 1-38 are allowed.
2. The following is an examiner's statement of reasons for allowance: In regards to claims 1, 16, 32, 37 and 38, prior art does not teach, suggest or disclose a method of miniaturizing the size of an organic structure on a substrate comprising applying an electrical potential to the substrate whereby the organic structure is electrochemically desorbed from the outside of the organic structure, or, effectively, miniaturizing the size of an organic structure on a previously patterned substrate (and therefore comprising multiple organic structures) by electrochemically desorbing the organic structure. The closest prior art is Crooks et al. (US 5885753 A) as submitted on Applicant's IDS. Crooks et al. discloses a method of electrochemically desorbing non-polymerized self-assembled monolayers (SAMs), i.e., the portion masked while undergoing ultra-violet light exposure. Such a desorption would occur simultaneously at any masked portion therefore effecting bulk removal of SAMs, and therefore not at the outside of the organic structure (as shown as **B** in Figure 3).
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ferguson et al. (US 6818117 B2) pertains to deposition of SAMs layers electrochemically.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to NICHOLAS A. SMITH whose telephone number is (571)272-8760. The examiner can normally be reached on 8:30 AM to 5:00 PM, Monday through Friday.
6. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on (571)-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
7. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
